

Service Integration Accelerator

This tool synthesises the structural and behavioural interfaces of services, and then normalises them for service adaptation in a service integration process in the setting of global business networks.

The structural Interface

```
<operation name='createOpenShipment' parameterOrder='CreateOpenShipmentRequest'>
  <input message='ns:CreateOpenShipmentRequest'/>
  <complexType name='CreateOpenShipmentRequest'>
    <sequence>
      <element name='ClientDetail' type='ns:ClientDetail' minOccurs='1'/>
      <element name='TransactionDetail' type='ns:TransactionDetail' minOccurs='0'/>
      <element name='Version' type='ns:VersionId' minOccurs='1'/>
      <element name='RequestedShipment' type='ns:RequestedShipment' minOccurs='0'/>
    </sequence>
  </complexType>
  </operation>

  <complexType name='RequestedShipment'>
    <sequence>
      <element name='ShipTimestamp' type='dateTime' minOccurs='0'/>
      <element name='DropoffType' type='ns:DropoffType' minOccurs='0'/>
      <element name='TotalWeight' type='ns:Weight' minOccurs='0'/>
      <element name='Shipper' type='ns:Party' minOccurs='0'/>
      <complexType name='Party'>
        <sequence>
          <element name='AccountNumber' type='string' minOccurs='0'/>
          <element name='Contact' type='ns:Contact' minOccurs='0'/>
          <element name='Address' type='ns:Address' minOccurs='0'/>
        </sequence>
      </complexType>
    </sequence>
  </complexType>
  </element>
  <element name='Recipient' type='ns:Party' minOccurs='0'/>
  <complexType name='Party'>
    <sequence>
      <element name='AccountNumber' type='string' minOccurs='0'/>
      <element name='Contact' type='ns:Contact' minOccurs='0'/>
      <element name='Address' type='ns:Address' minOccurs='0'/>
    </sequence>
  </complexType>
  </element>
  <element name='ShippingChargesPayment' type='ns:Payment' minOccurs='0'/>
  <complexType name='Payment'>
    <sequence>
      <element name='PaymentType' type='ns:PaymentType' minOccurs='0'/>
      <element name='Payor' type='ns:Payor' minOccurs='0'/>
    </sequence>
  </complexType>
  </element>
